

Sample Academic Context – Biology

Introduction to Biology

Biology is the study of living things. It explains how organisms grow, survive, and interact with their environment.

Branches of Biology

Botany studies plants. Zoology studies animals. Microbiology studies microscopic organisms like bacteria.

Cells as the Unit of Life

All living organisms are made of cells. Cells carry out basic life processes such as respiration and growth.

Levels of Organization

Life is organized from cells to tissues, organs, systems, and whole organisms.

Importance of Biology

Biology helps in medicine, agriculture, environmental protection, and understanding diseases.

Conclusion

Biology explains life processes and supports human survival and scientific progress.
